

# THE WORLD IN 2040

## Super-Smart Living

Allianz Partners has commissioned Futurologist Ray Hammond to look at the future of homelife in the year 2040, to help prepare for the longer term needs of customers. Here are his predictions about what the next 20 years will bring.

### By the year 2040, new homes will be...

#### Super secure:

Security systems will be based on the occupants' **biometrics**

**Hackers** will be the new 'burglars'

**Facial-pattern-recognition** software will identify and track occupants and pets

#### Super sustainable\*, consuming:

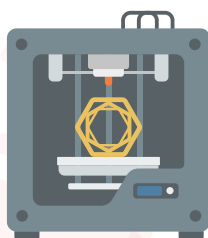

**75 %**  
less energy

**2/3**  
less water

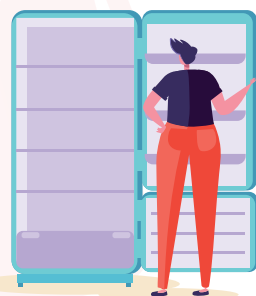

#### Super connected:

Thanks to **3D-printing**, clothes, toys, and other supplies can be made onsite

**Smart fridges** will monitor food and re-order supplies

# 7G

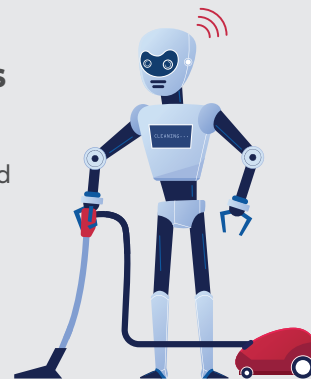

**7G** will be standard (which is 100,000x faster than 5G)

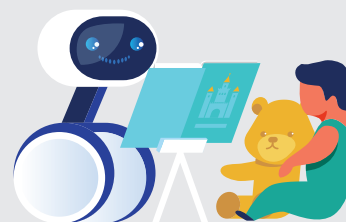

People will spend their free time on **immersive virtual entertainment and games**

#### Super convenient thanks to robots:

**Robots** will assist with all household tasks

**Talking robots** will provide companionship

**Allianz**  **Partners**
