1. Allianz Group results 3M 2021

Allianz has had an excellent start into 2021 and continued to successfully navigate the impact of the ongoing pandemic. The Group saw a strong performance across all business segments.

In 3M 2021, total revenues of Allianz Group declined 2.6% to €41.4 billion (3M 2020: €42.6 billion) and were flat compared to prior year, adjusted for currency and consolidation effects.

Operating profit increased 44.8% to €3.3 billion (3M 2020: €2.3 billion). Net income attributable to shareholders grew 83.4% to €2.6 billion (3M 2020: €1.4 billion) mostly driven by operating profit growth. Group Solvency II capitalization ratio was 210% at the end of the first quarter 2021, compared to 207% at year-end 2020.

In the Property-Casualty insurance segment, total revenues reached €19.7 billion (3M 2020: €20.3 billion). Adjusted for foreign exchange and consolidation effects, internal growth totaled to -1.6%. Operating profit rose strongly by 46.6% to €1.5 billion (3M 2020: €1.0). A significantly higher underwriting result benefited from a decrease in losses from natural catastrophes and from negligible Covid-19 effects in Q1 2021. The combined ratio improved 4.7%-p to 93.0% (3M 2020: 97.8%).

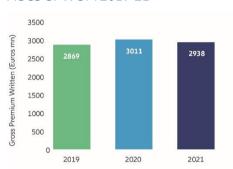

In the Life/Health insurance business, total revenues decreased by 2.4% to €20.0 billion (3M 2020: €20.5 billion). The present value of new business premiums rose to €19.5 billion (3M 2020: €18.0). Operating profit increased by 48% to €1.2 billion (3M 2020: €0.8 billion).

In Asset Management, operating profit rose by 10.0% to €747 million (3M 2020: €679 million). Third-party assets under management increased by €63 billion to €1,775 billion compared to the end of 2020.

2. AGCS1 results 3M 2021

In Q1 2021, AGCS gross premium written decreased by €73 million to €2.938 billion (3M 2020: €3.011 billion). Positive impact from effective rate changes of 22% for renewal business across the portfolio was offset by underwriting actions targeting loss making accounts and segments. Strongest rate increases were achieved in Financial Lines, Property and Aviation, but also the long-tail Lines of Business observed strong momentum on rate improvement.

AGCS GPW 3M 2019-21

The combined ratio for 3M 2021 stands at 98.3% (3M 2020: 117.5%), which is 19.2%-p better than prior year, mainly benefitting from a lower claims volume related to Covid-19. In Q1 2021, Covid-19 related reserves booked amounted to €40 million compared to €233 million in the first quarter of 2020. Also claims activity not related to the pandemic is lower for frequency & medium-size as well as large losses contributing to a better current accident year loss ratio compared to last year.

AGCS′ 3M 2021 operating profit of €81 million (3M 2020: operating loss of €141 million) is €222 million above prior year driven by a significantly lower impact from Covid-19 and a positive underwriting performance.
