

## FINANCIAL LINES

# Crime protect policy

Public and private companies face unique challenges navigating today's business environment. In spite of having concrete internal controls, it is increasingly difficult to guard against white-collar crime. The reliance on technology for financial accounting and transactions is core to all organizations and exposes a company's assets to threats from rogue employees and malicious third parties.

The best protection against these threats is to purchase the Allianz Crime Protect Policy, which addresses common losses such as employee theft and forgery, to more recent losses due to computer fraud, funds transfer fraud and social engineering.

The experienced underwriting team at Allianz understands the risks facing companies today and has developed a comprehensive insurance policy to address the exposures facing your business.
